

## BUOYANCY BALANCE

**EN 12390-7, BS 1881:114**

It is used for specific gravity determination of concrete or aggregates.

The density of concrete specimens are determined by dimensional checks, weighting and calculation or weight in air/water buoyancy method.

Comes with sample plate ,water tank and wire basket.

Electrostatic dyed.

The balance must be ordered seperately!

\*Digital balance is optional.

**SPECIFICATIONS:**

Product Code : BCO-111 Set  
BGE-607 Wire Basket  
BCO-111/1 Sample Plate  
BCO-111/2 Water Tank 380 x 240 x 280 mm  
Weight : 42 kg  
Dimensions : 970 x 500 x 400 mm,
