

## WATER IMPERMEABILITY TEST SYSTEM

**Standards:** ISO 7031, EN12390-8, DIN 1048-5, UNI 9533

### Technical Specifications:

- There are three measuring points.
- It has a suitable working height.
- It has a high strength structure.
- Water permeability can be measured.
- Water collection containers are made of stainless steel.
- Ergonomic and easy sample placement system is available.
- Sample fixing apparatuses are made of stainless steel, stainless steel and cast aluminum.
- The system can test 150x150x150 mm, 200x200x200 mm cube or 100x200 mm, 150x300 mm cylinder specimens
